

**UNIVERSITY OF TORONTO
FACULTY OF MEDICINE
CENTRE FOR INTERNATIONAL HEALTH
MONITORING AND EVALUATION UNIT**

INTRODUCTION

The Centre for International Health Monitoring and Evaluation (M&E) Unit is well positioned to provide critical analysis and perspective on global health programs on request from academic institutions, governments, non-governmental agencies, foundations and other funding agencies and programs.

The CIH M&E Unit is a creative and flexible service provider for stakeholders needs at various stages of program development. CIH consultants can be available for short term analysis of acute issues arising or as part of an ongoing evaluation process and monitoring system for quality improvement and accountability, the scaling up of programs or knowledge translation.

The CIH is a collaboration of University of Toronto leadership from diverse specialties with primary focus on global health challenges. The CIH has developed a special strength in monitoring and evaluation. It is well positioned to provide expert services in developing and managing evaluation and monitoring challenges in many health areas, especially in community based programs.

The main services of the CIH M&E UNIT are:

- Establishing baseline information systems which can be monitored and evaluated over the life of a project or intervention
- Collecting and analyzing data.
- Managing consultancies and implement highly professional, state of the art evaluations using latest methodologies.
- Designing consultancies which will be operationalized in collaboration with the communities most affected by programming and from the evaluation and in broad consultation with all relevant stakeholders.

The CIH M&E UNIT will be responsible to fine-tune the M&E process and subsequent results and provide deliverables in a timely and professional manner. Deliverables will be stakeholder specific but may include a presentation, a report and on-site meetings to discuss the results and possibly provide suggestions and recommendations, including fully developed strategies, for change and improvement.

The CIH M&E Unit include those with highly developed skills and many years of experience in conducting monitoring and evaluation services.

Examples of EXPERT TEAMS AVAILABLE FOR ISSUES RELATING TO:

Continuing Education
Health Policy, Organization, Quality Management and Planning
Health Systems Reform
Maternal Child Health
Nutrition
Economics/Finance
Mental Health
Health Promotion
Epidemiology
Education/Training
Communications and Information Management
Pharmaceuticals
