

Global Health Perspective for Women and Children

"I continue to be a co-instructor for graduate level course CHL5117, Public Health Sciences, Global Health Perspectives for Women and Children. At the end of 2006 we were preparing to start pediatric clinic at St. Michael's Hospital called International Health and Infectious Disease Clinic with the Department of Pediatrics, Ambulatory Pediatric Clinics. The clinic has an emphasis on immigrant/refugee children, internationally adopted children and children returning from travel is currently open. I continued to work at a pediatric and adult infectious/tropical disease consultant out of Access Alliance Multicultural Community Health Centre, whose population base is all high-risk immigrant, and refugee populations."

Anna Banerji, Assistant Professor
Department of Pediatrics and Public Health
Sciences
St. Michael's Hospital and
